

Recycled Crushed Glass

ARB Certified for permissible Dry outdoor blasting

QUICKER BLAST MEDIA

- Using crushed glass for sandblasting increases visibility and productivity due to the translucent dust created in the sandblasting operation
- Sandblasting glass has a unique cubic shape which removes coatings much faster than other blasting materials
- Can be used with HoldTight 102

SAFER BLAST MEDIA

- CARB Approved for outdoor sandblasting
- Contains NO HEAVY METALS, only crushed glass
- Suitable for both wet and dry sandblasting
- Listed on EPA's Procurement Guidelines for Sandblasting Grit
- Sandblasting glass is ideal for use near and around environmentally sensitive areas

GREENER BLAST MEDIA

- 100% RECYCLED post-consumer crushed glass for sandblasting
- Sandblasting glass is non-reactive and inert
- Using glass for sandblasting delivers a whiter finish from significantly reduced embedment compared to slag
- Use with HoldTight 102 to stop flash rust
